

The Ministry of the Interior, the Ministry of Sea, Transport and Infrastructure and the European Transport Safety Council invite you to a high level Road Safety Performance Index debate

## **PIN TALK IN CROATIA: IMPROVING YOUNG ROAD USER AND CYCLIST SAFETY**

**Date:** 1 December 2017, Friday, 09.15-15.00

**Venue:** Ministry of the Interior, Ilica 335, Zagreb

### **Background:**

Young drivers and riders aged 15-25 are more likely to be killed on Europe's roads than their older counterparts, despite continued improvements in road safety. Road collisions remain one of the highest external causes of death for young people.

Cycling is encouraged for the reasons of health and sustainability. However, road deaths of cyclists are decreasing at a slower rate than those of vehicle occupants in the EU. The safety of cyclists therefore should receive special attention.

A variety of measures have been adopted across Europe with the aim of reducing the collision risk of young people and improving cyclist safety. During the PIN Talk debate, the possible application of best European road safety practices in Croatia will be discussed.

### **PIN programme:**

ETSC's Road Safety Performance Index (PIN) programme was set up in 2006 as a response to the first road safety target set by the European Union to halve road deaths between 2001 and 2010. In 2010, the European Union renewed its commitment to reduce road deaths by 50% by 2020, compared to 2010 levels. By comparing Member State performance, the PIN serves to identify and promote best practice and inspire the kind of political leadership needed to deliver a road transport system that is as safe as possible. ETSC also organises PIN Talks in several member states each year. [www.etsc.eu/pin](http://www.etsc.eu/pin)

The PIN programme receives financial support from Volvo Group, Toyota Motor Europe, the German Road Safety Council, the Swedish Transport Administration and the Norwegian Public Roads Administration.
