

Roundtable discussion: Improving post collision care

Swedish Emergency Medical Service

Lina Gyllencreutz, Ph.D., P

Sveg, Sweden 2017 Best practice

Key notes

Improved competence of the pre-hospital personnel

National guidelines for pre-hospital care

Systemized training and co-operation

Improved competence – Registered Nurse

The National Board of Health and Welfare

Increase competence level to R.N.,
today often with specialist training in prehospital care

About 700 ambulances
About 2000 EMT and 3000 R.N.

3,2 million 112-calls per year,
about 1,1 million missions per year

National guidelines- pre-hospital care

- Advanced Trauma Life Support (ATLS)
 - Trauma Nurse Core Course (TNCC)
- Prehospital Trauma Life Support (PHTLS)

National guidelines- Major incidents

- Prehospital Sjukvårdsledning (PS) In Swedish
- Major Incident Medical Management and Support (MIMMS)

Systemized training- co-operation

Rescue- and ambulance teams in co-operation at crash site
