

Preventing Road Accidents and Injuries for the Safety of Employees

Driving for Work Risk Management

Dublin, 31.01.2019

Royal College of Physicians of Ireland,

6 Kildare Street, Dublin

In co-operation with the Road Safety Authority, the Health and Safety Authority, An Garda Síochána and the European Transport Safety Council (ETSC) have the pleasure of inviting you to a seminar on work-related road safety, to be held in Dublin on 31 January. Registration opens at 8.30 and the seminar will start at 9.00 finishing at 13.00 followed by a light lunch for participants.

On the agenda will be topics that will help Irish employers in their day-to-day fleet and work related risk management. Preventing Road Accidents and Injuries for the Safety of Employees (PRAISE) aims to increase road safety in the work context.

The project is co-funded by the MAPFRE Foundation, the German Road Safety Council (DVR), Mix Telematics and the Dräger Foundation. It aims to “praise” best practices in order to help employers secure high road safety standards for their employees.

In the framework of this campaign, ETSC is organising a series of country seminars in selected member states bringing together companies, fleet safety managers, government representatives and road safety experts to discuss latest developments and priorities in work related road safety.
