12.30	End of the meeting

ETSC's Road Safety Performance Index (PIN) programme was set up in 2006 as a response to the first road safety target set by the European Union to halve road deaths between 2001 and 2010. Following this target, the 27 EU Member States together with the UK agreed to, and worked towards, the aim of achieving the common target to halve the number of road deaths in the EU over the period 2010- 2020. A new target to halve road deaths and the first target to halve the number of serious road traffic injuries by 2030 compared to 2020 levels in the EU were announced by the European Commission on 17 May 2018.

By comparing Member State performance, the PIN serves to identify and promote best practice and inspire the kind of political leadership needed to deliver a road transport system that is as safe as possible. The PIN covers all relevant areas of road safety including road user behaviour, infrastructure and vehicles, as well as road safety policymaking. Each year ETSC publishes PIN 'Flash' reports on specific areas of road safety. All PIN reports are available at [www.etsc.eu/pin](http://www.etsc.eu/pin).

In June each year ETSC's analysis of overall annual progress on tackling road deaths and serious injuries is published in the PIN Annual Report. The report covers 32 countries, including all EU Member States.

Each year ETSC hosts the PIN conference which is also the platform for the presentation of the PIN Award to the best performing country.

ETSC, together with its national Members, also organises PIN Talks in several Member States each year.

The PIN programme receives financial support from the German Road Safety Council (DVR), Toyota Motor Europe, the Norwegian Public Roads Administration and CITA - the International Motor Vehicle Inspection Committee.
