**VISION  
ZERO**

# VISION ZERO Strategy

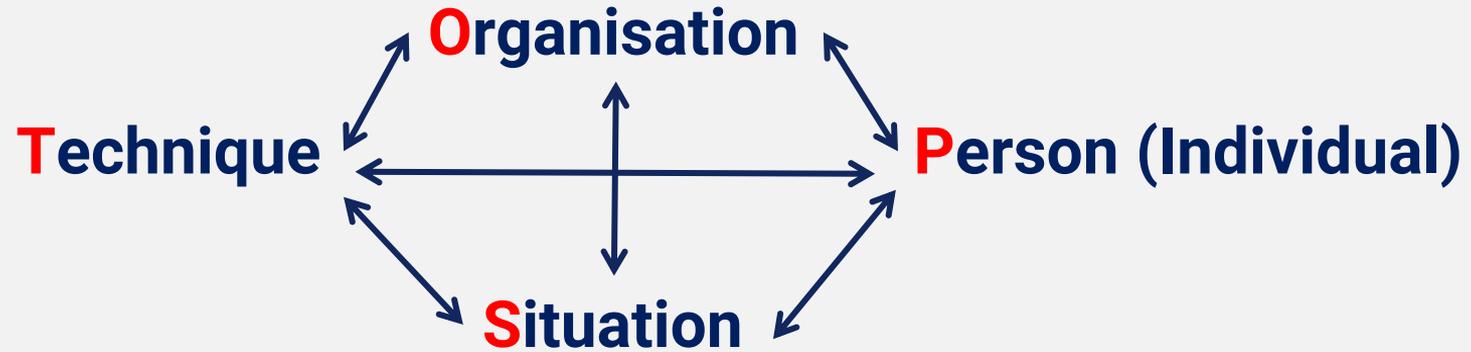

Since October 2007 DVR's road safety activities are based on the "Vision Zero" strategy. Vision Zero is based on four fundamental principles:

- 1) Human beings are fallible.
- 2) Tolerable limits are set by physical endurance.
- 3) Life is not negotiable.
- 4) Mistakes must not be punished with death or serious injury.

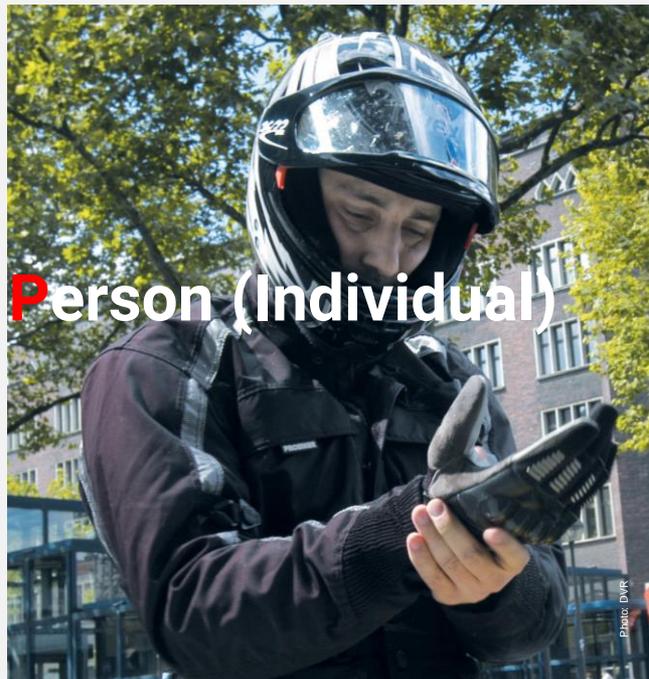

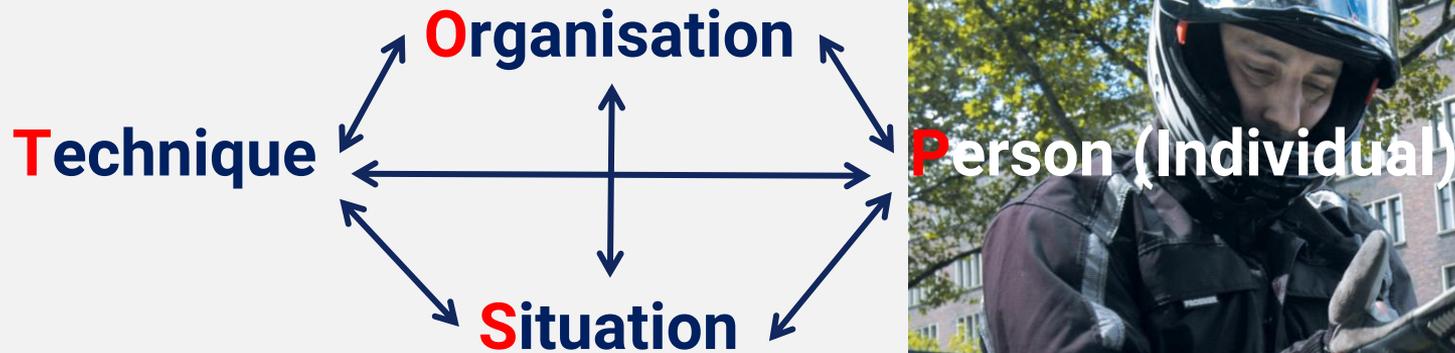

**VISION  
ZERO**

## Quality label – why?

There are several **high quality training schemes** offered on the market, but there are also others that may have **counter-productive effects** or are of inferior quality.

## Quality label

- Practical driver training to be conducted on appropriate traffic training premises.
- Practical driver training to be conducted on public roads
- Practical driver training to be conducted on both public roads and on appropriate training premises (combined training)
- Seminars delivered in combination with one of the three aforementioned practical driver training types
- Seminars delivered in the fields of driving technique, ecological driving and driving under blue light conditions using advanced driving simulators.

# Quality label – criteria

What does the DVR Quality Label guarantee?

Contents

Methodologies

Quality assurance

Initial qualification of the trainer

Education and further education of trainers

Optional module

Training premises

VISION  
ZERO

Quality for a life without fatalities or serious injuries!
