About the ETSC PIN programme

ETSC's Road Safety Performance Index (PIN) programme was set up in 2006 as a response to the first road safety target set by the European Union to halve road deaths between 2001 and 2010. In 2010, the European Union renewed its commitment to reduce road deaths by 50% by 2020, compared to 2010 levels. By comparing Member State performance, the PIN serves to identify and promote best practice and inspire the kind of political leadership needed to deliver a road transport system that is as safe as possible. ETSC also organises PIN Talks in several member states each year: www.etsc.eu/pin

The PIN programme receives financial support from Toyota Motor Europe, Volvo Group, the German Road Safety Council, the Swedish Transport Administration and the Norwegian Public Roads Administration.
